

Dear Parents,

Welcome back to a busy summer term in Class One. This half term we will begin our topic of time travellers. As the term proceeds we will be focusing on history and understanding the concept of chronology. In science we will be continuing to explore plants and everyday materials. The children will be making a class time machine as the means of travelling through different points in history to understand what life was like at that time.

In Maths we will continue to use the concrete, pictorial and abstract method of learning. This term we are developing our understanding of place value using the numbers 0 - 50. We will then move on to learn about multiplication and division.

We will put a copy of our current topic web and timetable on the class blog so you can find out more about what your child will be learning.

We would like to thank you for your continued support in helping the children to complete the phonics activities and reading at home each week. We would like to make you aware that the children will be receiving more phonics activities as we near the phonics screening test that will take place in June. The activities will be more individualised to each child and aims to support their learning in phonics.

If you would like to discuss anything concerning your child please do not hesitate to make an appointment to see us.

Kind Regards

Miss Rahman and Mrs Bennett
